4 READING

a You're going to read an article about new rules for eating. Look at the six paragraph headings and try to guess the missing words.

- 1 **Don't start the day with black** _____
- 2 **Eat plain** _____ **before a meal**
- 3 **Eat** _____ **before meat and fish**
- 4 **Eat** _____ **before carbs**
- 5 _____ **your food thoroughly**
- 6 _____ **up to digest a meal**

b Read the article once and check your answers in a. Did you guess any of the words? Complete the article with the headings.

c Read the article again. Match the advice from each paragraph 1–6 to the reason why it's better for you.

- A Eating like this makes you feel fuller.
- B It's more difficult to manage your blood sugar levels.
- C It increases the speed of digestion.
- D You'll probably eat less.
- E It helps you digest a meal more easily and you're less likely to develop heart problems.
- F It helps you digest a meal more easily and you use more energy as you eat.

d Complete five compound nouns from the article. How do you say them in your language?

- 1 blood _____
- 2 _____ disease
- 3 _____ pressure
- 4 _____ science
- 5 stress _____

Compound nouns

Compound nouns are two nouns together, where the first noun describes the second one, e.g., *coffee machine*. The stress is usually on the first noun.

e With a partner, answer the questions for each piece of advice.

- 1 Do you usually do what the experts recommend? If not, why not?
- 2 Do you believe the information? Why (not)?
- 3 Will you change your habits as a result of the advice?

How you should eat: the new rules

Is it good to start the day with a coffee? Should you eat protein before carbs? These days, it's not just *what* we eat and drink that's important. Now, scientists are coming up with rules about *how* we should consume food and drinks. Here is some of their latest advice.

1

Do you turn on the coffee machine as soon as you wake up? It's a habit you might want to change. Research shows that drinking black coffee in order to wake yourself up can have a negative effect. "Blood sugar control is impaired when the first thing our bodies come into contact with is black coffee," says Professor James Betts. "It's better to eat something first and then drink coffee later if you need it."

2

Yogurt is a great addition to your diet for many health reasons. And the best time to eat it is before a meal, according to food scientists at the University of Wisconsin–Madison. Participants in the research were asked to eat a dish of plain yogurt followed by a large high-fat, high-carb meal. The yogurt improved digestion and also helped reduce the chance of heart disease.

3

From a plate of meat or fish and green or brightly colored vegetables, it is the vegetables that should be eaten first. In one study, children who ate the meat or fish at the start of a meal were more likely to be overweight than children who ate the vegetables first. "Vegetables contain fiber, which fills you up," says nutritionist Ian Marber.

4

Eat the meat, fish, eggs, cheese, or tofu on your plate, that is, the protein, before potatoes, rice, pasta, or bread. Researchers in New York suggest that the worst time to eat carbs is at the beginning of a meal or on an empty stomach. In the study, participants ate ciabatta bread before or after eating a meal of grilled chicken with lettuce, tomatoes, and cucumber. The results showed that eating the carbs after the protein helped reduce appetite.

5

Spending time chewing your food can help with high blood pressure, heart disease, and diabetes. At Waseda University, in Japan, scientists found that when people chewed their food once a second for 30 seconds, it resulted in better digestion and they also used up more calories. According to Professor Naoyuki Hayashi, a researcher in the faculty of sports science, the effect is small for each meal, but over 365 days a year, it makes a big difference.

6

Eating your lunch on the run means you will probably eat faster and enjoy the food less, according to psychologists from the University of South Florida. But once you have finished eating, their research showed that it is best to stand up and move around. In their study, they asked 358 participants to rate their stress levels while eating sitting or standing. Those who ate while seated said they enjoyed their meals more, but scientists found that the people who walked around digested their meal about five minutes faster than the people lying down or sitting.

5 LISTENING

- a Look at the photo and read about Marianna Leivaditaki. What has she achieved in her career so far? What kind of food do you think she specializes in?

Marianna Leivaditaki

is a food consultant and chef, who for many years ran a very successful London restaurant called Morito. She is the author of a cookbook called *Aegean*, and has written food columns for many newspapers.

She was born on the island of Crete, in Greece. Her father was a Cretan fisherman and her mother was Scottish. Together they ran a seafood restaurant, and Marianna first learned to cook there. She loves traditional food as well as going to new places and learning new things.

Marianna says, "The way I cook is the way I think – lots of things are happening at the same time. When I think of new dishes, my inspiration comes mostly from people, traveling, and creating marriages between the old and traditional to create something new and different."

- b You're going to watch Part 1 of an interview with Marianna where she talks about her childhood in Crete. Look at photos A–E. What can you see in them?

- c**  **Video** Watch *In conversation with Marianna Leivaditaki Part 1* and check. Which photo does she say these things about?

- 1 “We got to enjoy every single one of them.”
- 2 “I absolutely loved doing that.”
- 3 “It’s my number one choice every time.”
- 4 “Delicious street food.”
- 5 “She used to know everything about foraging wild food.”

Glossary
foraging searching (usually in the countryside or by the ocean) for things you can eat

- d** Watch again. What does she say about the following?

- 1 why they ate “a funny mixture” of food at home
- 2 the price of fish in Crete
- 3 her blue notebook
- 4 her aunt Koula
- 5 eating out in the evening

- e**  **Video** Now watch Part 2. Then number these events in her life in order (1–7). What details can you remember about each one?

- A She got a job at a restaurant called Moro.
- B She studied psychology at the University of Kent.
- C She went traveling around Southern Europe and to Ecuador.
- D She worked in her family restaurant in Crete.
- E She wrote a recipe book.
- F She had her son, Ermis.
- G She helped open a restaurant called Morito.

- f** What about you? Answer the questions with a partner.

- 1 What was your favorite food when you were a child?
- 2 What kind of things did your mother or father cook? Do you still eat them?
- 3 Do you have a favorite restaurant or café? What do you like most about it – the food, the atmosphere, the service, or the price?

6 GRAMMAR simple present and present continuous, action and nonaction verbs

- a** Look at three sentences from the interview. Circle the correct verb form.

- 3 I have also written *Aegean*, which is my own cookbook, and it’s like a life journal, which I *love* / *am loving* and will cherish forever.

- b**  **1.8** Listen and check. Why do you think she uses each form?

- c**  **Grammar Bank 1A p.140**

6 READING

- a What's your position in your family? Are you the oldest child, a middle child, the youngest child, or an only child?
- b Look at four groups of adjectives. Which group do you think goes with each position in the family (e.g., the oldest)?
 - 1 outgoing, charming, and disorganized
 - 2 responsible, ambitious, and anxious
 - 3 self-confident, independent, and spoiled
 - 4 sociable, sensitive, and unambitious
- c Read the article and check your answers. Do you think it's possible that birth order affects personality?

How birth order influences your personality

A common theory supported by many psychologists is that our position in the family – that is, whether we're the oldest child, a middle child, the youngest child, or an only child – is a strong influence on our character and personality. So what influence does it have?

The oldest child

Firstborn children often have to look after their younger brothers and sisters, so they're usually sensible and responsible as adults. They also tend to be ambitious and they make good leaders. On the negative side, oldest children can be insecure and anxious. This is because ¹

The middle child

Middle children are more relaxed than the oldest children, probably because ² . They're usually very sociable – the kind of people who get along with everybody. They are also usually sensitive to what other people need because ³ . For the same reason, they're often good at dealing with arguments, and they're always sympathetic to the ones on the losing side, or in general, to people who are having problems. On the other hand, middle children can sometimes be unambitious, and they can lack direction in life.

The youngest child

Youngest children are often very outgoing and charming. This is the way they try to get the attention of both their parents and their older brothers and sisters. They are often more rebellious, and this is probably because ⁴ . They can also be immature and disorganized, and they often depend too much on other people because ⁵ .

The only child

Only children usually do very well at school because they have a lot of contact with adults. They get a lot of love and attention from their parents, so they're typically self-confident. They're also independent because they spend so much time by themselves. And because ⁶ , they're often very organized. Only children can sometimes be spoiled because ⁷ by their parents. They can also be very selfish and get impatient, especially when things go wrong. This is because ⁸ .

However, not all psychologists agree. Several large and recent studies suggest that although some birth order effects exist, they make only a small difference to personality. Psychologist Ralph Hertwig thinks that birth order influences personalities in children, but those effects vanish when people become adults.

d Read the article again and complete it with reasons A–H.

- A they grew up between older and younger brothers and sisters
- B it's easier for them to break the rules – by the time they were born, their parents were more relaxed about discipline
- C their parents were more relaxed themselves by the time the second child arrived
- D they are given everything they ask for
- E they have always been the baby of the family
- F they spend a lot of time with adults
- G they've never had to deal with problems with other brothers and sisters
- H when the second child was born, they lost some of their parents' attention, and maybe they felt rejected

e Read the paragraph that applies to you again. Do you think the description of personality is true for you? Are any of the other descriptions true for people you know, e.g., your brothers and sisters, or friends?
